Outline of the Technology Transfer 2019

Summer School

The EU4TECH Summer School has been designed to build understanding and competencies in the field of technology transfer. There are two 'tracks' available.

Track 1: Designed for researchers

Content:

- Introduction to the fundamentals of technology transfer
- Understanding and using intellectual Property Rights including licensing technology
- Communicating and working with industry
- From Proof of Concept to New Product Development
- Commercialising through spinout and start-up
- From research results to business models

Track 2: Designed for staff of TTOs, Innovation Centres, incubators and other innovation support organisations.

Content:

- The WIPO Universities IP ToolKit
- Encouraging more collaborations with industry
- Licensing master-class
- Supporting a spinoff initiative at your HEI
- ASTP Proton regional networks and associations.
